Award-Winning Social Networking Company Adds New Colocation Services at INAP's Santa Clara and Dallas Data Centers

February 5, 2018

As an existing customer of AgileSERVER, Performance IP and MIRO Controller services, this satisfied global customer is now adding colocation services

INAP chosen for its flexibility and ability to propose a robust, efficient and dense colocation footprint in Santa Clara as well as at a geographically-diverse site in Dallas

ATLANTA, Feb. 05, 2018 (GLOBE NEWSWIRE) -- Internap Corporation (NASDAQ:INAP), a leading provider of high-performance data center services including colocation, managed hosting, cloud and network services, announced a multi-year agreement with a pioneer in the social networking arena, for space, power and network services at INAP's Santa Clara and Dallas data centers. INAP will provide sizeable power at 600 kW and bandwidth at 40Gbps via dual diverse feeds.

INAP has been contracted for colocation services to help support the client's 300+ million members to engage, communicate and connect with people for both online and offline experiences and bring content closer to the end user.

"In closing the deal with this industry-recognized leader, the customer's VP of IT & Dev Ops, Technology emphasized that they are pleased to expand our partnership," said Gary Furman, INAP's National Account Manager. "Companies in the highly competitive sector recognize INAP's ability to provide the services required to meet their company's needs."

In making its selection through a rigorous competitive process, the social networking company selected INAP's Dallas location as the company's diverse data center for purposes of business continuity and disaster recovery given its superiority in density of power, network and security. These factors and the necessary certifications and compliance requirements allow INAP to meet the mission critical network management needs of this and other clients being hosted in its Dallas, Santa Clara and other data center facilities.

About Internap Corporation
