INAP Announces Colocation Agreement with Leading Global Provider of Information and Communication Technology

July 25, 2018

New customer win for INAP's Canadian subsidiary iWeb Technologies within one of their Montreal Data Centers

INAP and iWeb chosen for ability to meet the customer's current and growth needs in space, power and network

RESTON, Va., July 25, 2018 (GLOBE NEWSWIRE) -- Internap Corporation (NASDAQ:INAP), a leading provider of high-performance data center services including colocation, cloud, and network, today announced an agreement with an internationally recognized leader in communications technology with a large portfolio ranging across networks, digital services, managed services and emerging business platforms, for Colocation services in Montreal.

"Our new Europe-based client was looking to move some of their IT infrastructure off-premise to a data center services provider near one of their Canadian offices in Montreal," said Andrew Day, SVP & GM, INAP International. "We're very pleased that we were able to meet their Canadian division's requirements in a tight timeframe."

Montreal continues to be a priority location for INAP given its established Canadian team, the low cost of power, and as an alternate location close to the eastern U.S. The Canadian city also ranks among the top 10 high-tech centers in North America with major industries that include aerospace, artificial intelligence, video game developers and the film industry.

"We're excited to add this global brand to our client roster, and will work hard to build upon this relationship," said   Roberto Montesi, VP & GM, iWeb. "We're confident our respective global footprints and capabilities will be a great fit."

About INAP
Internap Corporation (NASDAQ:INAP) is a leading provider of high-performance data center services, including colocation, cloud and network. INAP partners with its customers, who range from the Fortune 500 to emerging start-ups, to create secure, scalable and reliable IT infrastructure solutions that meet the customer's unique business requirements. INAP operates in 58 primarily Tier 3 data centers in 21 metropolitan markets and has 99 POPs around the world.
