

Global Leader in Online Gaming Services Fragnet Selects INAP for Bare Metal Solutions

March 7, 2019

INAP chosen to support Fragnet's global infrastructure based on its patented, low-latency route optimization engine designed for maximum network performance.

INAP's New York, Dallas, Chicago and Amsterdam data centers selected as hosting sites for cloud services.

RESTON, Va., March 07, 2019 (GLOBE NEWSWIRE) -- Internap Corporation (NASDAQ: INAP), a leading-edge provider of high-performance data center and cloud solutions, and Fragnet, an international leader in online gaming services including game servers, dedicated gaming servers and voice over IP communication software, today announced a deal for managed bare metal solutions.

Fragnet, headquartered in Sweden, partnered with INAP for their expertise in supporting scalable managed bare metal hosting that meets clients' current and future infrastructure needs. Additionally, INAP's high-performance network solutions and worldwide reach assure Fragnet's customers experience ultra-low latency and high availability, critical requirements for online gaming partners.

"We are very pleased to begin a partnership with Fragnet, a growing global gaming services company that is transforming the gaming experience," said Andrew Day, Chief Operating Officer, INAP. "Companies in this sector continually recognize that INAP's high-performance bare metal and network services can provide them with the scalability and performance required to ensure the best user experience."

INAP Bare Metal is a high-performance, single-tenant hosting solution built on the latest enterprise-grade hardware. Each custom-configured or on-demand solution includes INAP Performance IP. The route-optimized IP service automatically directs Fragnet's outbound traffic along the lowest-latency path. Globally, Performance IP makes approximately 500 million route optimizations every day.

About Internap Corporation

Internap Corporation (NASDAQ: INAP) is a leading-edge provider of high-performance data center and cloud solutions with over 100 network Points of Presence worldwide. INAP's full-spectrum portfolio of high-density colocation, managed cloud hosting and network solutions supports evolving IT infrastructure requirements for customers ranging from the Fortune 500 to emerging startups. INAP operates in 21 metropolitan markets, primarily in North America, with data centers connected by a low-latency, high-capacity fiber network. INAP has over one million gross square feet in its portfolio, with approximately 600,000 square feet of sellable data center space. For more information, visit www.INAP.com.

About Fragnet

Fragnet is a leading provider in online gaming services including game servers, dedicated gaming servers and voice over IP communication software. Our network infrastructure spans 30 data centres worldwide. A good network, though, is nothing without quality hardware. Our machines use only high end enterprise components. This ensures great reliability and performance of every service we offer. Since the beginning we have worked tirelessly to provide a quality of service unmatched in our industry, not only in the services we offer but in the support we provide to each and every customer.
