

InSync Healthcare Solutions and INAP Announce Multi-Year Deal for Custom Managed Cloud Services

March 11, 2019

InSync selects INAP as a one-stop solution to meet critical infrastructure needs and secure business continuity solutions for their customers

INAP's Atlanta and Chicago data centers selected as hosting sites for cloud services

RESTON, Va., March 11, 2019 (GLOBE NEWSWIRE) -- Internap Corporation (NASDAQ: INAP), a leading-edge provider of high-performance data center and cloud solutions and InSync Healthcare Solutions, a leading provider of cloud-based, fully integrated healthcare solutions, today announced a multi-year deal for managed cloud services.

InSync's services and solutions for healthcare professionals throughout the United States provide enhanced efficiency for complex healthcare organizations. These best-in-class partnerships require secure environments and robust data protection. To meet these needs, InSync chose INAP to provide a custom managed cloud solution above and beyond other providers in this space.

"Industry leaders in the healthcare technology space, like InSync, require the ultimate level of customer data protection and systems to meet complex Health Insurance Portability and Accountability Act, or HIPAA, compliance and auditing requirements," said Andy Day, Chief Operating Officer, INAP. "INAP is proud to partner with InSync to deliver these winning solutions and ultimately meet company's strict security and business continuity requirements."

"The protection of our customers' data is our top priority. We know their efforts to effectively treat patients by the thousands of providers who use InSync each and every day could be compromised without sufficient data security," said Trent Baker, chief information security officer at InSync Healthcare Solutions. "This partnership with INAP will only strengthen our security capabilities further, while allowing our clients to trust in the reliability and performance of our leading technology solution."

In addition to their production environment, InSync will protect their data with INAP Cloud Backup. Powered by Veeam Cloud Connect, the service is a simple, affordable and secure way to guarantee data protection. It offers premium SAN Storage, complimentary data seeding and transfer, and SafetyNet Emergency Access—a service that restores backups to a private cloud environment in the event of a primary system failure in the customer's data center.

About Internap Corporation

Internap Corporation (NASDAQ: INAP) is a leading-edge provider of high-performance data center and cloud solutions with over 100 network Points of Presence worldwide.
